

### 1.4.6 Export data

To export data, click on the **GDA2020** or the **GDA94** icon.

In the **Export Data** screen, select the layers and format you require and finalise the export.

Once the files have been exported, click on **Click here to download the file** link. Files can be exported individually, or all at once.

The downloaded file will appear at the bottom left-hand corner of the screen. Click on the file to open/save.
